Greetings,

**FAMILY ASSISTANCE NEEDED**

With truth and sincerity I write you this letter hoping that you will be of good assistance to my family. I am Mrs. Linda Adesa, from the Democratic Republic of Congo {DRC} the wife of the late Mr. Williams Adesa. My Late Husband Mr. Williams Adesa. was the Managing Director of the Democratic Republic of Congo {DRC} Gold and Diamond Mine industry during the reign of late President of Congo, Laurent Kabila who was assassinated on 16 January 2001 and his son Joseph Kabila took over governance of the country ten days later. My late husband was killed by rebel groups as he was accused of been a supporter of Laurent Kabila during the beginning of the civil war in my country.

I got your address through network online, courtesy of South African information exchange here in South Africa; Something draw my attention to you. I write to ask of your kind favour and gesture. However, we are saddled with the problem of securing a trust worthy individual/company with a confidential and certified foreign account to perfectly transfer the sum of US \$18.5 Million United States dollars for investments in your country.

My late husband on my behalf in South Africa deposited this (MONEY) to a Finance/Security company in South Africa as a Bond before he was assassinated. But due to the South Africa Government Policy that prohibits an asylum seeking [family} from operating Bank account or indulging in any business transaction whatsoever, my family decided to seek for a foreign partner, be it a personal or company to assist us transfer this fund abroad for investment purposes.

The ethnic conflicts had started over land issues but ended up as bloody struggles for control of resources, as in the case of (Ituri Province) in the northeast where leaders of armed groups have manipulated tensions between the (Hema) and the Lendu people to serve their own political and economic interests. According to a demographic study published in April 2003 by the International Rescue Committee, an NGO based in the ((US) over 3.3 million people have died in the conflict. A great number died of side effects of the war such as malnutrition and diseases caused by massive displacement of population and the collapse of the country's political and health-care systems. This conflict is one of the most deadly in Africa's history.

I feel confident to introduce this offer to you as a trustworthy and a humbly person. For your participation and assistance of this transfer, a negotiable percentage will be discussed based on your interest, but my family is willing to offer 30% of the total sum for the assistance. Conclusively, you're requested to furnish me back your interest in the above matter. Please contact my Son Frank Adesa, on email or call on the above number also provide your telephone/fax numbers for easy communication and your personal details (identification) to enable me update you with more information regarding this matter.

I will need this transaction to be concluded within a short period of time so I can relocate to your country and invest under your supervision. Please kindly attend to this letter as a letter from a widow who is in need of your assistance.

Waiting for your urgent reply,  
Thank's  
Mrs. Linda Adesa  
For the family.
